

Do **genetics** influence children's ability to recover from trauma?

Join us for a discussion of the issues!!

- What is genetics and why does it matter?
- What is involved in genetics research?
- Are there any benefits to child participation?
- What are the risks?
- Will minorities be stigmatized?
- Can the data be properly protected?

We are **not** looking to recruit people for research. We are interested in hearing your opinions and sharing information.

Date: Tuesday, April 28th

Time: 5:00 – 6:30

Clifford Beers

93 Edwards Street, New Haven

Dinner and child care available.

Joan Kaufman, Ph.D., Associate Professor of Psychiatry, Yale University, Director, CARE Program, Co-Director Child Welfare Unit Zigler Center for Child Development and Social Policy
